Source: Own elaboration from the Spanish Survey of Household Finances (EFF, BdE). Values weighted with survey weights and multiple imputation. Within each year, rows are grouped by income percentile (Total, P10–P90) and broken down by the age group of the household head. *Income:* mean annual household income (EUR, rounded). *HH size* in number of members; *Age:* mean age of the household (years); education and sex shares in %. The number of observations for each calculation is reported in Table 13.
