Source: Own elaboration from the Spanish Survey of Household Finances (EFF, Banco de España). Values are weighted using survey weights and multiple imputations. Within each year, rows are grouped by per capita income percentile group—Total, P10, P25, P50, P75 and P90—and broken down by the age group of the household head. *PC income*: mean annual per capita household income, rounded in euros. *HH size*: average number of household members. *Age*: mean age of the household head. Education and sex variables are expressed as percentages.
